Harnessing Al for the public good

Our second National AI Strategy, or NAIS 2.0, outlines our vision for Singapore to be a place where AI serves as a force for good, and where we harness AI to uplift and empower our people and businesses. To achieve our vision and goals, we will direct efforts under NAIS 2.0 toward 3 Systems, working through 10 Enablers.

- Update national Al R&D plans to sustain leadership in select research areas
- Improve Public Service productivity, with new value propositions for our citizens
- Anchor new Al Centres of Excellence
 (CoE) across companies, and explore
 establishing Sectoral Al CoEs to drive
 sophisticated Al value creation and
 usage in key sectors
- Strengthen our Al start-up ecosystem, including attracting Al-focused accelerator programmes to spur rapid Al experimentation
- Significantly increase high-performance compute available in Singapore
 - Build capabilities in data services and Privacy Enhancing Technologies
 - Unlock Government data for use cases that serve the Public Good

- Attract world's top Al creators to work from and with Singapore
- Boost **AI practitioner pool** to 15,000
 - Intensify enterprise Al adoption for industry transformation
 - Upskill workforce through sector-specific Al training programmes
 - Establish iconic Al site to co-locate
 Al creators and practitioners, and nurture the Al community in Singapore

- Establish Singapore as an ambitious and pragmatic international partner on Al innovation and governance
- Ensure fit-for-purpose regulatory environment for Al
- Raise security and resilience baseline for Al
